EXECUTIVE SUMMARY

Motivated IT undergraduate specializing in Artificial Intelligence, with strong skills in Python programming and Machine Learning, along with foundational knowledge of Generative AI and Large Language Models (LLMs). Proficient in object-oriented programming (OOP), data structures & algorithms (DSA), and problem-solving, with experience in developing user-focused solutions. Seeking an AI Intern / AI Engineering Internship to apply technical expertise, contribute to innovative AI-driven projects, and grow in a dynamic, collaborative environment.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, HTML, CSS, SQL (Oracle, MySQL)
- **AI & Machine Learning:** Supervised & Unsupervised Learning, Linear Regression, Decision Trees, Support Vector Machines (SVM)
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, RAG MERN Stack, Tailwind CSS
- **Data & AI Concepts:** Data Cleaning & Preprocessing, Dataset Handling (CSV, JSON), Natural Language Processing (NLP), Generative AI & Large Language Models (LLMs)
- **Tools & Platforms:** Git, GitHub, Visual Studio Code (VS Code), Jupyter Notebook, Google Colab, Pinecone, OpenAI API
- **Core Competencies:** API-Driven Architecture, Design Patterns, REST API Development (Flask), Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Problem Solving

EDUCATION

Sri Lanka Institute of Information Technology

2024-2026

- BSc (Hons) in Information Technology – Specializing in Artificial Intelligence
- 2nd Year Student | [CGPA: 3.2 / 4.0](#)

PROJECTS

End-to-End Medical Chatbot GenAI | OpenAI, Pinecone, Flask, LLMs, RAG, Python

- Developed an AI-powered medical chatbot using LLMs for intelligent question answering, integrating OpenAI for natural language understanding and Pinecone for efficient vector search.
- Built backend APIs with Flask to retrieve relevant medical data and generate accurate, context-aware responses, improving user interaction and response quality.

AI Summarizer | Python, Flask, React, OpenAI APIs

- Developed a full-stack AI-powered summarization platform to generate concise summaries from plain text and PDF documents.
- Integrated OpenAI APIs and modern NLP techniques to extract key insights, with a React frontend and Flask backend for seamless user interaction.

AI/ML Model Training with Data Preprocessing Pipeline | Python, Scikit-learn, XGBoost

- Developed an end-to-end ML pipeline including data preprocessing, feature engineering, model training, and evaluation on structured datasets.
- Implemented and compared models (Linear Regression, Decision Tree, Random Forest, SVR, XGBoost, MLP) using MAE and R² to select the best-performing model for accurate predictions.

Driving School Registration and Scheduling System | Java, Servlet, HTML, Tailwind CSS, JavaScript

- Developed a driving school management system enabling student registration, lesson scheduling, and secure payment processing.
- Implemented features to assign instructors to lessons, submit and manage user feedback, and allow admin responses, utilized local files for efficient data storage and management.

Achievements
